# INTRODUCTIONS OF 1951

## INTRODUCERS DESCRIPTION

- NOKOMIS** (DePetrus) — Oct. 15 — Large Bronze Decorative. Another outstanding DePetrus introduction.
- REWARD** (Yoder) — Oct. 25 — Very productive deep pink daisy that holds color in July and August. Easily the outstanding and early pink daisy for June 15 to Sept. 15 flowering. 60 day response.
- BUCKSKIN** (Yoder) — Oct. 25 — A tawny bronze daisy. Easily replaces California Bronze Daisy in the early cloth house program. Production is outstanding. 60 day response.
- SONGSTER** (Yoder) — Oct. 25 — An intermediate white pompon. Withstands heat well. A good variety for June, July and August flowering. More productive and higher quality flower than Pristine.
- HALO** (Yoder) — Nov. 5 — A White Daisy for cloth house. The most productive early white daisy. For best results the time between pinch and shade should not exceed 28 days. 66 day response.
- CRESDENDO** (Yoder) — Nov. 5 — A beautiful large yellow pompon. Outstanding variety for the high temperature period from May 15 to Sept. 15. A very tall growing variety. Has a 76 day response to short day treatment but requires 10 less long days for growth than is generally recommended for this group.
- PARAGON** (Yoder) — Nov. 15 — A large red pompon. Heavy producer. A red Masterpiece with good flower substance. Sept. 1 to Nov. 20th. 76 day response.
- KLONDIKE** (Yoder) — Nov. 20 — An orange yellow pompon. Best described as an intense orange yellow Masterpiece. Useful in natural sprays, disbudded sprays, or small disbuds. Outstanding in April, May and June; also October through December. 80 day response.
- LOLLIPOP** (Yoder) — Nov. 20 — A lemon yellow pompon. Very formal, round and hard. Has a long season of usefulness, fast response and good production. A good variety for every week of the year. 76 day response.
- MRS. DEWEY** (Cummings) — Nov. 20 — A heavy petalled deep bronze single for Thanksgiving. The duplex nature of this flower together with a unique coloring make this a very desirable variety for late September, October and November. A strong grower. Ships and handles exceptionally well.
- PARAMOUNT** (Yoder) — Nov. 28 — Intermediate white pompon. Larger than Priscilla. Sunnyside growth with good response. Freer and more sturdy growth than Cordova. Tolerates a wide temperature range. For October through March flowering. 86 day response.
- FALCON** (Yoder) — Dec. 1 — Intermediate reddish bronze pompon. An improved Rusticon. Flowers easily October 15 to March 15. 86 day response.
- SPANGLES** (Yoder) — Dec. 5 — Small white pompon. Best described as a late white Sunnyside, which it resembles both in flower form and growth habit.
- DEBUTANTE** (Yoder) — Dec. 10 — Large pink single with color similar to that of Valencia. Grows shorter and produces better than Rosalind. Best at lower temperatures, therefore, easier to grow than the Valencias. Good through November, December, January and February. 90 day response.
- CHRISTMAS GREETING** (Yoder) — Dec. 20 — Large red decorative. The one red pompon for Christmas with good production. It has a place in the flowering program from Nov. 15th to Feb. 15th. 96 day response.
- SUNRISE** (Yoder) — Dec. 24 — A yellow pompon best described as a late Gold Coast. Sunrise is not sensitive to low night temperatures. A better growth habit than either Yellow Snow or Golden Anniversary.
- SNOWLINE** (Yoder) — Dec. 10 — A large showy white flower. A December 'Mum that is easy to do. Does well in average greenhouse conditions.

# CHRYSANTHEMUM ROOTED CUTTINGS AVAILABLE 1951.

## MINIMUM ORDER 50 CUTTINGS OF A VARIETY

### ABBREVIATIONS USED ARE AS FOLLOWS:

Sh — Suitable for growing under shade.

P — Suitable for growing as pot plant.

D — Suitable for disbudding.

L — Large

Pom. — Pompon

Dec. — Decorative

M. — Intermediate

S — Small

## ● TERMS OF SALE ●

### MINIMUM ORDER 50 CUTTINGS OF A VARIETY

**TERMS** — Cash, unless credit is established.

**C. O. D. ORDERS** Must be accompanied by one-fourth the amount of the order in Cash to insure acceptance.

Prices quoted are for the trade only, parties outside of the trade add 25% to prices quoted.

We give no warranty, expressed or implied, as to the productiveness of any stock and are in no way responsible for the crop. Our liability in any instance is limited to the purchase price.

### OUR PROPRGATING STOCK

All cuttings furnished by us are grown from stock that has bloomed normally, is apparently free of any disease and has been carefully selected and rogued, thus assuring you of cuttings from only the best quality stock.

### EARLY BUDS

Buds will develop in many varieties of Chrysanthemum Cuttings during the short days of late winter and early spring — especially if greenhouse temperatures are maintained above 50 degrees.

If you must maintain temperatures higher than recommended, two hours of artificial lighting each night in February and March and one hour in April would be advisable so as to prevent the cuttings from setting bud.
